WEEK-02

NAME: ARAVIND RAJESH

Reg No: 240701046

Week: 02-01

Question 1

```
Correct
Marked out of 3.00
Flag question
 Many people think about their height in feet
 and inches, even in some countries that
 primarily use the metric system. Write a
```

program that reads a number of feet from the

user, followed by a number of inches. Once

these values are read, your program should compute and display the equivalent number of centimeters. Hint: One foot is 12 inches. One inch is 2.54 centimeters. **Input Format**

First line, read the number of feet. Second line, read the number of inches.

Output Format

Note: All of the values should be displayed using two decimal places.

Sample Input 1 56

Sample Output 1 167.64

In one line print the height in centimeters.

Answer: (penalty regime: 0 %)

int main()

#include<stdio.h>

return 0;

Ace editor not ready. Perhaps reload page? Falling back to raw text area.

{

}

Correct

by b

by b

Sample Output

106 94 600 16 4

int main()

{

}

Input Format

int feet , inches; float centimeters; scanf("%d",&feet);

scanf("%d",&inches); inches+=feet*12; centimeters=inches*2.54;

printf("%.2f\n",centimeters);

```
Input
                Expected
                            Got
         5
                167.64
                            167.64

Question 2
```

```
Marked out of 5.00
Flag question
 Create a program that reads two integers, a
 and b, from the user. Your program should
 compute and display: • The sum of a and b •
 The difference when b is subtracted from a •
```

The product of a and b • The quotient when a is

divided by b • The remainder when a is divided

```
Second line, read the second number.
Output Format
First line, print the sum of a and b
Second line, print the difference when b is
subtracted from a
Third line, print the product of a and b
```

Fourth line, print the quotient when a is divided

Fifth line, print the remainder when a is divided

by b Sample Input 1 100 6

Falling back to raw text area.

#include<stdio.h>

int a,b;

Input |

First line, read the first number.

Answer: (penalty regime: 0 %) Ace editor not ready. Perhaps reload page?

```
scanf("%d%d",&a,&b);
int sum=a+b;
int difference=a-b;
int product=a*b;
int quotient=a/b;
int reminder=a%b;
```

printf("%d\n",difference);

printf("%d\n",product);

printf("%d\n",quotient);

printf("%d\n",reminder);

Expected

Got

printf("%d\n",sum);

	~	100 6	106 94 600 16 4	106 94 600 16 4	~		
	Passe	ed all tes	sts! 🗸				
Question 3							
Correct							
Marked out of 7.00							
V n	ay olo Vrite a umbe	d bread a progra er of loav	loaves of browning is discounted that begind we so the following the local browning in the user.	d by 6 ns by 1 d brea	60 pei readin ad bei	rcent. ig the ng	

should display the regular price for the bread,

the discount because it is a day old, and the

total price. Each of these amounts should be displayed on its own line with an appropriate

label. All of the values should be displayed

Read the number of day old loaves.

First line, print Regular price: price

Second line, print Discount: discount

Note: All of the values should be displayed

using two decimal places.

Third line, print Total: total

using two decimal places.

Input Format

Output Format

Sample Input 1

Sample Output 1

10

```
Regular price: 34.90
Discount: 20.94
Total: 13.96
Answer: (penalty regime: 0 %)
Ace editor not ready. Perhaps reload page?
Falling back to raw text area.
 #include<stdio.h>
 int main(){
      int n;
```

printf("Total: %.2f\n",t); return 0; }

Expected

printf("Regular price:

printf("Discount: %.2f\n",d);

float r,d,t;

r=n*3.49;

d=r*0.6;

t=r-d;

%.2f\n",r);

Question 2
Correct
Marked out of 5.00
Defens the cuttoned of conema visus to the
Before the outbreak of corona virus to the
world, a meeting happened in a room in Wuhan.
A person who attended that meeting had
COVID-19 and no one in the room knew about

it! So everyone started shaking hands with

everyone got infected! Given the fact that any

two persons shake hand exactly once, Can you

tell the total count of handshakes happened in

that meeting? Say no to shakehands. Regularly

Read an integer N, the total number of people

everyone else in the room as a gesture of

respect and after meeting unfortunately

wash your hands. Stay Safe.

Question 3
Correct
Marked out of 7.00
Flag question
 In our school days, all of us have enjoyed the
 Games period. Raghav loves to play cricket and
 is Captain of his team. He always wanted to win
```

all cricket matches. But only one last Games

period is left in school now. After that he will

pass out from school. So, this match is very

important to him. He does not want to lose it.

So he has done a lot of planning to make sure

his teams wins. He is worried about only one

opponent - Jatin, who is very good batsman.

techniques, that could be most beneficial for

dismissing Jatin. He has given points to each of

the 3 techniques. You need to tell him which is

the maximum point value, so that Raghav can

select best technique. 3 numbers are given in

input. Output the maximum of these numbers.

Three space separated integers.

Maximum integer value

SAMPLE INPUT

Input:

Output:

861

8 9

}

Raghav has figured out 3 types of bowling

SAMPLE OUTPUT 8 Explanation Out of given numbers, 8 is maximum. **Answer:** (penalty regime: 0 %) #include<stdio.h> 2 🔻 int main(){ 3 int n1,n2,n3; scanf("%d %d %d",&n1,&n2,&n3) 4 if((n1>n2)&&(n1>n3)) 5 6 ▼ printf("%d",n1); 7
